EDUCATION

University of Florida

Gainesville, FL

Bachelor of Science in Computer Science (GPA - 3.72)

December 2026

- Coursework: Computer Architecture, Data Structures and Algorithms, Engineering Statistics, Operating Systems, Computer Networking, Databases, Algorithm Abstraction and Design

SKILLS

Languages: Python, JavaScript/TypeScript, Go, C++, SQL, Java, Bash

Frameworks / Tools: Linux, Docker, Ansible, Prometheus, Grafana, Splunk, AWS, Pytest, GitHub Actions, Ollama, FastAPI, MySQL, Nginx, Terraform, Google ADK, FastAPI, Express.js, HuggingFace, Tailscale

EXPERIENCE

Site Reliability Engineering Intern

May 2026 - Aug. 2026

GoDaddy

Tempe, AZ

- Led migration of **end-of-life** security tooling to **Ansible** IaC on a WAF fleet protecting **450k+** customer domains
- Increased log-shipping throughput **8x** on central server and **reduced average CPU utilization 10%** per-fleet-server under peak load by migrating to **rsyslog** and implementing connection pooling and event batching
- Closed a **PCI DSS compliance** gap by enabling file integrity monitoring and real-time alerting with **AIDE/auditd**
- Replaced **3,700+** untracked Bash scripts with **7 Ansible-managed** Python functions and partnered with Control Plane team to move customer onboarding from manual to a **REST API**

Software Engineering Intern

Sep. 2025 - Dec. 2025

Cisco (Splunk)

Gainesville, FL (Remote)

- Led research on **agentic** cloud incident response meant to assist FedRAMP and Azure cloud teams
- Reduced **agent evaluation** time **30%** by automating semantic similarity scoring against RCAs with **RoBERTa**
- Automated reporting for **7 key evaluation metrics** by scripting conversions from CSV files to **Splunk dashboards**

Production Engineering Fellow (MLH Fellowship)

Jun. 2025 - Sep. 2025

Meta

Tallahassee, FL (Remote)

- Deployed portfolio web app with **containerized FastAPI, MySQL, Nginx microservices** to DigitalOcean Linux server
- Authored redeployment shell scripts and **Pytest** suite with **83% coverage** run via **GitHub Actions** CI/CD pipeline
- Enabled **120s** incident response time by providing real-time visibility and alerting with **Prometheus/Grafana** stack

C++ Programming Fundamentals Teaching Assistant

Jan. 2025 – May 2025

The University of Florida

Gainesville, FL

- Led weekly discussions to **30+** students teaching fundamental topics like **OOP** and **memory management**
- Supported **500+** students across 7 class projects and provided 1:1 support to 10 students weekly in office hours
- Received **100% positive feedback** and reviews in end-of-semester survey sent out to 30+ students

PROJECTS

Lucio (Terminal AI Agent) | Google Agent Development Kit, Ollama, Gemini API, Golang

- Built a terminal Spotify **AI agent**, exposing **14** tools for natural-language playback, search, and playlist control
- Reduced tool output tokens by **45%** while preserving response quality by implementing custom **TOON** encoding
- Engineered custom **Ollama connector** implementing Google ADK's LLM interface for local model tool-calling

Devil's Advocate Agent (GoDaddy Hackathon Winner) | Springboot, SpringAI, React, Tailwind, Java

- Won **Best AI Focus** track by unifying **3 specialized agents** into one agent that critiques business strategies
- Grounded agent critiques in a **prompt-engineered** rubric from insights from **25** local business owner interviews and a custom "startup graveyard" **MCP** checking strategy against **135** failed startups

EXTRACURRICULARS

Technical Project Lead

Sep. 2025 - May 2026

ColorStack

University of Florida

- Led **6 developers** across backend and frontend teams developing full-stack **cross-domain generalist knowledge graph construction (KGC)** app, which was demoed to **50+ club members** at the end of the semester
- Coordinated task assignments, technical milestones, and **AGILE** sprint progress reporting through **Jira**
- Architected **distributed** on-prem **GLiNER2** entity-extraction and LLM relationship-extraction KGC pipeline
